About The Institution of Engineers (India)

The Institution of Engineers (India) or IEI is the largest multidisciplinary professional body that encompasses 15 engineering disciplines and gives engineers a global platform from which to share professional interest. IEI has membership strength of more than 0.7 million. Established in 1920, with its headquarters at 8, Gokhale Road, Kolkata 700020, IEI has served the engineering fraternity nearly for a century. In this period of time it has been inextricably linked with the history of modern-day engineering.

In 1935, IEI was incorporated by Royal Charter and remains the only professional body in India to be accorded this honour. Today, its quest for professional excellence has given it a place of pride in almost every prestigious and relevant organization across the globe. IEI functions among professional engineers, academicians and research workers. It provides a vast array of technical, professional and supporting services to the Government, Industries, Academia and the Engineering fraternity, operating from 105 Centres located across the country. The Institution has established R&D centres at various locations in the country and also provides grant-in-aid to its members to conduct research and development on engineering subjects.

IEI conducts Section A & B Examinations in different Engineering disciplines, the successful completion of which is recognized as equivalent to Degree in appropriate field of Engineering of recognized Universities of India by the Ministry of Human Resources Development, Govt. of India. Every year as many as 90000 candidates appear for these exams. For details, please visit: www.ieindia.org

About The Institution of Engineers (India),Kerala State Centre

The Institution of Engineers (India), Kerala State Centre (IEI, KSC) is functioning from 1947 onwards and has completed 71 years of yomen services to all Engineers both academic and practicing engineers. There are 5 Local Centres of IEI Kerala State Centre are Kochi, Trichur, Palghat, Kozhikode and Kollam.

About the Seminar

Innovation Mechanisation which have attracted the attention of farmers are timely field operation, higher field efficiencies, higher productivities and reduction in human drudgery. The field operations which have been mechanised comparatively to a greater degree on the tillage, seeding, irrigation, harvesting, toughing and transport. The widespread introduction and use of tractors and various Agricultural Machinery attachment lead to growth of innovation mechanization in agricultural field.

On the other hand there are many gaps in respect of mechanization of field crops, horticultural crops, and forage crops in rain fed agriculture because of the absence of appropriate and suitable machines and also no appropriate technology has been developed to meet the aspirations of small and medium farmers of the country.

The innovative mechanization is helpful for the reduction of human power, reduction in cost of crop cultivation, reduction in harvesting, employment generation of youth through custom hiring and thus creation of higher standards of living among the farming communities. Keeping this in mind, IEI Kerala State Centre proposes to conduct two days seminar on the above subject on 25th and 26th May 2018.

Seminar will have

1. Invited Lectures
2. Presentation of paper on relevant topic
3. Agricultural Machinery Exhibition
4. Interactive Session of Farmers and Technocrafts
